

HAZEL CHÁVEZ ALVARADO

Software Development Technician | Full Stack Web Developer

hazelchavez56@gmail.com | +506 8552-0126 | Guanacaste, Costa Rica | [linkedin.com/in/hazel-chavez-alvarado](https://www.linkedin.com/in/hazel-chavez-alvarado) | github.com/hazel-chavez | portafolio-hazel-chavez.vercel.app

PROFESSIONAL SUMMARY

Web Developer proficient in the MEVN stack (MongoDB, Express.js, Vue.js, Node.js) with proven experience building websites and online stores with WordPress and WooCommerce for international clients on Upwork. Built dynamic JavaScript interfaces, real-time search engines and full-stack applications with JWT authentication deployed in production. Focused on delivering functional, responsive solutions with a strong emphasis on user experience, managing projects independently from requirements through to deployment.

EDUCATION

- Higher Technical Degree in Software Development — Universidad Cenfotec, San José** July 2025
• Coursework: Full-Stack Web Programming, Software Engineering, Web Design, Data Structures
- Web Development Bootcamp — Alura ONE Next Education (Remote)** June 2023
• Version control with Git and GitHub, object-oriented programming and web development
- Higher Technical Degree in Front-End Development — Instituto Nacional de Aprendizaje** July 2022
• Coursework: Computational Logic, Interface Design, Web Programming, Backend Development
- Computer Technician — Universidad Técnica Nacional** 2014
Additional training: Intensive English (MG Capacitaciones/INA) • Python (INA & Cisco) • SQL and Data Management (INA) • English for IT 1 & 2 (Cisco/MICITT)

EXPERIENCE

- WordPress Web Developer (Freelance) — Upwork — Remote** 2025 – 2026
• Delivered a casino review platform to an international client: visual identity, professional branding and functional content built from scratch.
• Built a JavaScript + ACF search engine enabling real-time content filtering without page reload.
• Handled full client communication in English (B1): requirements, revisions and final delivery with remote client.

TECHNICAL PROJECTS

- School Management System — Full Stack** April 2026 – Present
Node.js • Express • MongoDB • Bootstrap 5 • REST API • JWT • JavaScript (ES6+)
• Full-stack application live in production with JWT authentication and role-based access control (admin/guest) managing users, schools, grades and educational materials.
• Responsive Bootstrap 5 interface deployed on Render; modular Express + Mongoose architecture built to scale.
- E-commerce Technology Website — WordPress** 2022
WordPress • WooCommerce • Elementor • MySQL • PHP • SEO
• Fully operational WooCommerce store with product catalog, events calendar and WhatsApp integration for direct customer contact.
• Custom Elementor design built for conversion, with basic SEO optimization applied from the start.
- Mobile Phone Inventory System — Frontend SPA** 2026
Vue 3 • Vite • JavaScript • CSS3 • Bootstrap
• Vue 3 SPA deployed on Vercel with frontend authentication, full CRUD, real-time search and role-protected navigation.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), Vue.js 3, Bootstrap 5, Elementor, Responsive Design
Backend: Node.js, Express.js, EJS, REST APIs, JWT, Mongoose
Databases: MongoDB, MySQL, SQL
Tools: Git, GitHub, VS Code, Vercel, WordPress, WooCommerce, ACF, GitHub Copilot, Google Stitch
