

# HAZEL CHÁVEZ ALVARADO

Full Stack Developer · MEVN Stack (MongoDB, Express, Vue.js, Node.js)

Guanacaste, Costa Rica | hazelchavez56@gmail.com | +506 8552-0126 | linkedin.com/in/hazel-chavez-alvarado | github.com/hazelchavez | portafolio-hazel-chavez.vercel.app

---

## PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and deploying production applications on the MEVN stack, including REST APIs, JWT authentication, and role-based access control. Proven track record delivering custom WordPress/WooCommerce solutions for international clients, including ongoing technical maintenance and support (multi-site, hosting/cPanel, migrations). Able to manage projects independently from requirements through deployment, with technical English (B1) for client communication.

## TECHNICAL SKILLS

**Frontend:** JavaScript (ES6+), Vue.js 3, HTML5, CSS3, Bootstrap 5, Responsive Design

**Backend:** Node.js, Express.js, REST APIs, JWT, Role-Based Access Control, Mongoose, bcrypt, Nodemailer

**Databases:** MongoDB, MySQL, SQL

**Tools & Platforms:** Git, GitHub, VS Code, Vercel, Render, cPanel/FTP, WordPress, WooCommerce, Elementor, Kadence, ACF, GitHub Copilot

## PROFESSIONAL EXPERIENCE

### Freelance WordPress Developer — Current Client (Remote)

Aug. 2026 – Present

- Implemented functional and technical improvements to a WordPress website, including SEO configuration and structured data review.
- Reviewed SEO plugin configuration, homepage settings, and structured data, validating the implementation with Google Rich Results Test.
- Implemented a registration link inside a login popup using JavaScript and a custom mu-plugin.
- Developed a technical documentation section (/docs) with sidebar navigation, internal links, and reusable components using Kadence.
- Troubleshooted WordPress configuration and plugin-related issues while following the client's existing website structure.

### Freelance Web Developer — Upwork (Remote)

2025 – 2026

- Delivered a casino review platform for an international client, building visual identity, branding, and functional content from scratch.
- Built a dynamic real-time search engine with JavaScript and ACF, allowing content filtering without page reloads.
- Managed technical communication fully in English (B1): requirements gathering, revisions, and final delivery with the remote client.

## TECHNICAL PROJECTS

### School Management System — Full Stack

Apr. 2026 – Present

Node.js, Express, MongoDB, Bootstrap 5, REST API, JWT, bcrypt, Nodemailer

- Built a production full-stack application with JWT authentication, password hashing (bcrypt), and role-based access control (admin/guest) to manage users, schools, grades, and educational materials.
- Designed a modular architecture with Express and Mongoose; responsive UI with Bootstrap 5, deployed on Render.

### Technology Website — WordPress E-commerce

2022

- Built a fully operational WooCommerce store: product catalog, event calendar, and WhatsApp integration for direct customer support.
